Dear Mr. Sajer:

Enclosed is the FINAL Prevention of Significant Deterioration (PSD) Permit No. 4911-061-0001-P-01-0 for Yellow Pine Energy Company, LLC (Yellow Pine) located at Georgia Highway 39 (Clay County) for the construction and operation of a 110-megawatt (MW) biomass-fired power plant. The Georgia Environmental Protection Division – Air Protection Branch has completed its review of this application. Construction on the project as listed in Application No. 17700 may now commence.

The PSD Preliminary Determination that the proposed construction and operation at said facility should be approved was issued on February 26, 2009. The public notice concerning the application and preliminary determination appeared in *The Cuthbert Southern Tribune* (legal organ for Clay County) on March 5, 2009. The 30-day public comment period expired on April 14, 2009. Comments were received from U.S. EPA, San Joaquin Valley Air Pollution Control District, facility, and public.

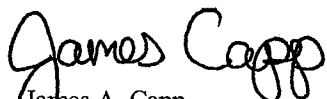

It is the Final Determination that the proposed construction of the Yellow Pine facility should be approved. Enclosed is Air Quality Permit No. 4911-061-0001-P-01-0 and a copy of the Final Determination. This Permit is for the facility construction listed in Application No. 17700. It is not transferable nor is it valid if the originally approved process or facility is changed or modified.
